

CLAIMS

What is claimed is:

1. A hard disk drive mounting rack comprising:

two frame racks and several accompanied screws, said screws are installed onto the
5 screw holes on both sides of the HDD, said frame racks are fastened to the fastening holes
of the metal case that is originally for the HDD racks, an inserting slot is on the front of
said frame rack, said screws slide into the inserting slots of said frame racks, a switch is
on the front of said frame rack, said switches are closed after the HDD is installed for fast
replacement.

10 2. The hard disk drive mounting rack recited in claim 1, wherein a hook is on the back of
said frame rack, an inserting slot is on the front of said frame rack, a switch is on the front
of said frame rack.

3. The hard disk drive mounting rack recited in claim 2, wherein a clipping slot is on the
end of said inserting slot of said frame rack.

15 4. The hard disk drive mounting rack recited in claim 2, wherein a strengthening part is
on the top back of said switch of said frame rack.

5. The hard disk drive mounting rack recited in claim 1, wherein said screws have a flat
sphere body on the front and threads on the back.
